

## CodySoft January 28<sup>th</sup> 2021 release notes:

### PBP Module:

1. String search/processing match options
  - a. When searching you can now select whether to search for any matching results or only for whole words, including letters, numbers or hyphens.
2. Allow Sub-Selection of fields instead of default "ALL/GLOBAL"
  - a. This functionality is both within the Rules Wizard as well as when editing a rule

Global Find and Replace within Rules

Cancel

3. Additional Rule Extensions Intelligence to trim/remove specific embedded characters from values

### Rule Extensions

Rule Extension: SBTTest012521 [✎](#)

Transform your value in Steps

Apply a series of Steps to transform a value. Most Steps have options or values that further adjust the transformation. Steps are applied in the order they appear on the page. You can change this order when adding Steps.

Select the checkmark ✓ to finish editing this Step.

#### ✓ Trim Characters from Values
